

# COUPLING 613 QF

# COUPLING 613 QF

– assemble a frame without any tools !

The 613QF is a coupling used to assemble frames that do not require any tools.

Simply lift the pin up before you insert the coupling into the profile. When coupling is in the correct position, it is easy to press down the pin and the frame is then complete.

Coupling 613 is available in two versions. 613QF is a toolless coupling for fast assembling and suitable for tool free installations. While 613 is supplied with grub screws for more permanent structures.

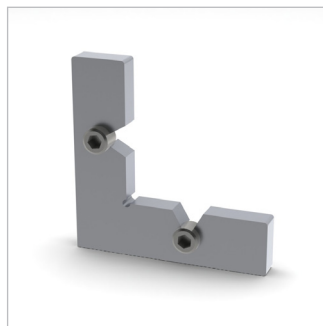

**FACTS:**

Made in steel.

Art No	Description	Size	
871 066 92	Coupling 613 QF	135x135mm	with push button
871 043 92	Coupling 613	60x60mm	with screw

Fast and easy assembling of aluminium frames. 613QF is mounted in a second.

613 is a stronger version of 613QF. It is mounted with screws instead of push buttons, which is more suitable for permanent installations.
