

COUPLING 614

COUPLING 614

– strong and safe !

Coupling 614 is a strong and safe coupling to build stable and strong frames in our profiles with the standard core (90-serie). 614 fits 80TX, 92TX and 92B for solutions with panels.

Each frame is mounted on a minimal amount of time using the flexible coupling and an Allen key.

The coupling provides a very stable and safe assembly and the frame is as easy to disassemble again when you need to.

Coupling 614 suits hanging construction because of it's safety.

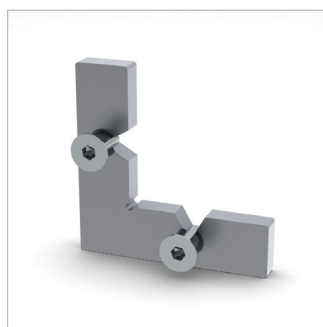

FACTS:

Made of aluminium.

Art No	Description	Size	Packaging
614	Coupling 614	60x8x60 mm	100 pcs

Mitered frame with coupling 614.
