

COUPLING 617

COUPLING 617

– strong and safe !

The 617 coupling is a strong and sturdy new corner bracket for mitred frame corners.

Fitting in any standard channel the versatile 617 offers a robust alternative to the 610.

Frames are assembled in minimal time by simply inserting the flexible coupling and fastening with an Allen key.

This coupling provides durable and strong solution to mitred corners, offering greater strength in frame assembly that is also easy to disassemble when required.

FACTS:

Made of aluminium.
