# PROFILE 91B

– a double sided solution !

Profile 91B is used to attach a thin graphics to your profile. The flange that hides the image edge is only 2.5 mm. Recommended media is 0.5 mm.

The profile is double sided which allows elegant double-sided frames and shop rack for promotions and more.

Picture change is very simple which make picture change at customers place possible.

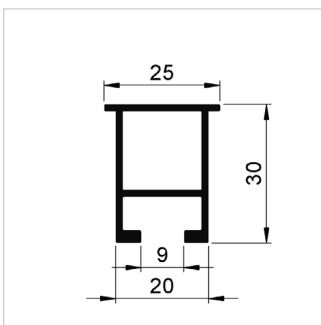

**FACTS:**

Natural anodised aluminium profile 91B is supplied in 5 m stock lengths or can be cut to custom sizes.

Recommended media: Display film Heavy 0,45mm.
