

Do you change your banner once a year or more often? Then this SMART-Lift is the right solution for you!

SMART-Lift comes in a complete kit and is very easy to assemble. You easily change the message yourself and you do not have to hire an assembly company or rent a sky lift. The construction is very robust and easy to work. Side cover plates protect against the wind and are available in any RAL color, adapted to suit the color of the facade. The solid lift construction means that the picture, as opposed to simpler designs, always runs easily up and down, regardless of the season, temperature and age of the elevator. The message can also be raised high above ground level. SMART-Lift is available in widths up to 12 meters. Banner and lighting are not included.

Over 6 meters width 2 cranks are needed

The crank is detachable and with an adapter (not included) you can operate SMART-Lift with an electric screwdriver

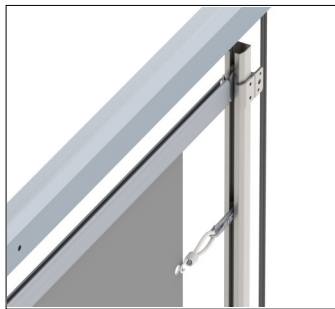

**FACTS:**

Steel frame, keder rails in the upper and lower edges of the lift, Robust crank device adapted to size and load of the picture lift. Side rails in steel, ball-bearing trolleys and textile-covered rubber bands keep the image smooth and tense in all positions.

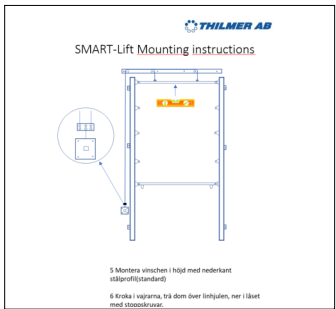

Art no	Description	Size
011.B000.H000	Smart-Lift	W000 x H000 mm
Example		
011.4000.3000	Smart-Lift	4000 x 3000 mm

The rigid construction allows large image dimensions with widths up to 12 meters. Over 6 meters 2 cranks are needed.

SMART-Lift has a very solid lift device with ball-mounted rollers running in an enclosed rail.

Complete step-by-step assembly instructions included, tailored to your particular SMART-Lift.
